<p>1. At long last we have a [] trace report on Subject, who you will recall was identified as one of the wartime GIS Case Officers for []. It is attached (in rough translation) for information and file. Obviously, it does not advance the plot tremendously, but current field traces are expected from the German Station in the near future.</p> <p>2. For [] One point of possible marginal interest emerges in Attachment, herewith. [] will note that [] records show, that Subject was traced with them by KUBARK (or at least that his name appeared in connection with their response to some other trace) in June 1947. We are inclined to feel that this may tie in with our trace request to [] in 1947 concerning [] although we can find no specific record of ZSCHUNKE's name in the 1947 exchange on this matter.</p> <p>[]</p>
